

NEC Hosted Collaboration Service

Intuitive, cost-effective collaboration from any location

The ability to participate in multimedia presentations is critical to keeping your business competitive. Online meetings reduce travel costs by connecting individuals from various locations and improve productivity by reducing communications delays and errors. Web conferencing and collaboration also provide a richer conferencing experience than plain voice communication. This can dramatically improve the type and quality of the information transmitted.

At a Glance

- A more efficient collaboration solution
- Easy to use remote access
- A smart alternative to the classroom
- An extremely cost effective solution
- No installation or setup required
- A wide range of intuitive features

NEC Hosted Collaboration Service offers the ability to provide feature-rich web conferences with up to 16 video windows per conference – all through a browser-based subscription solution. This service can scale with your needs to support an unlimited number of attendees for both voice and video conferencing.

A More Efficient Collaboration Solution

By using NEC Hosted Collaboration Service for web conferences, your workers can collaborate seamlessly from any location. They can attend online meetings, share and jointly work on documents and presentation, and even share their PC desktops – all in real time. Because users no longer need to travel or send a host of e-mails to work together, your projects are completed more quickly, and your organization becomes more efficient.

Easy to Use Remote Access

Using the service is easy. To participate in a meeting or collaboration session, users simply click the link in the invitation to launch their web browsers. They can then listen to presentations, interact with other attendees and collaborate on projects as if they were all in the same room.

A Smart Alternative to the Classroom

NEC Hosted Collaboration Service is perfect for use as a training tool. Students can attend and participate in classes without ever leaving their desks. Customer demonstrations and presentations are also conducted more easily – especially if centralized resources would have been required.

An Extremely Cost Effective Solution

Because there is no upfront cost or capital equipment to purchase with this solution, NEC Hosted Collaboration Service offers tremendous economic benefits for your organization. Your business pays a flat monthly rate for unlimited access. You can use standard PCs, video cameras and web browsers – no new hardware or software is required.

No Installation or Setup Required

Because this service is hosted, no installation or setup is needed – all your online conferencing and collaboration tools are securely accessed through the web. Hosts can easily set up conferences through their web browser or a Microsoft® Outlook toolbar provided for that service.

A Wide Range of Intuitive Features

NEC Hosted Collaboration offers an extensive list of easy-to-use features. This 100% browser-based solution is compatible with standard video cameras and Windows, Mac and Linux systems. Users have unlimited 24/7 access to video and audio conferencing from any location. Additionally, this service provides:

- Up to 16 viewable video windows per conference
- Both VoIP and standard PSTN audio conferencing
- Private and group chat windows
- The ability for the moderator to take complete control of a conference when necessary
- Video and audio (VoIP audio) mute capabilities – either simultaneously or alone
- Video windows that can be arranged on the desktop to meet user needs
- Video and/or audio quality adjustment
- Security features to ensure your communication is protected
- The ability to send out or respond to e-mail conference invitations
- Immediate direct connection to impromptu meetings
- Support for real-time application and desktop sharing
