

△△ STARPLUS® STS™

*Refreshingly Simple,  
Refreshingly Affordable*

# STARPLUS<sup>®</sup> STS<sup>™</sup> Phone System

## Refreshingly Flexible

- PBX/Centrex Compatibility
- Supports full T1, fractional T1 or ISDN PRI
- Phones are CTI adaptable
- ADP – Additional Device Port on every phone for fax or modem connection
- Standard 2.5 mm Headset Jack on every phone
- Voice Mail does not reduce System Capacity
- UCD & LCR Capability

## Refreshingly Simple

- Easy to Configure, Install & Program
- One phone model loaded with features
- Soft keys below display enable quick access to system features
- Name & number display Caller ID is available on all phones
- Optional In-Skin Voice Mail
- Basic or Expanded System options

The Vodavi STARPLUS<sup>®</sup> STS system is perfect for small businesses and is loaded with many features previously available only to larger enterprises. Best of all, this system is modestly priced, making it refreshingly affordable as well.

## *Hold the Phone...*

Rather than offering multiple phone models, we've packed all the features you need in one handsome, easy-to-use speakerphone. Available in charcoal gray or off-white, the STARPLUS STS phone has 24 flexible buttons that can be programmed to monitor stations in-use, enable one-touch speed dial, or to enable system features such as Do Not Disturb, All Call Page, and many more.

The phone also has 3 interactive soft keys positioned directly below the 2 x 24 character display that enable quick access to common system features. The phone is CTI capable as well. The speakerphone enables convenient hands-free use and the volume control independently controls both handset and speaker volume.

<i>STS System Capacities</i>	<i>CO Lines</i>	<i>Digital Stations</i>	<i>Analog Ports</i>
<b>Basic System (BKSU)</b>	<b>12</b>	<b>24</b>	<b>2*</b>
<b>Max Capacity With (EKSU)</b>	<b>24</b>	<b>48</b>	<b>2*</b>

\*The total number of analog (SLT) devices per system that can be supported is 22 (including the 2 on board).  
If 22 SLT's are installed, the digital station count is reduced to 8.

# STARPLUS STS<sup>™</sup> *In-Skin* Voice Mail

Vodavi offers two voice processing solutions for the STARPLUS STS System, an In-Skin Flash Voice Mail Card and an In-Skin HDD Voice Mail Card.

## *STARPLUS STS In-Skin Flash Voice Mail Card*

Designed for small office/home office applications, this is a great entry-level voice mail system that will allow users to reap the benefits of voice messaging with very little investment. This is an 8-port system with 64 mailboxes and 3 hours of message storage, expandable to 9 hours.

This system has the following productivity enhancing features:

- Live Call Screening/Answering Machine Emulation
- Automated Attendant
- Automatic Routing
- Dial-by-Name
- Fax Detection
- Menu Routing
- One Touch Record
- Pager Notification
- Password Protection
- RAN Announcement Mailbox
- Smart Transfer
- Time & Date Stamp
- Voice Messaging

## *STARPLUS STS In-Skin HDD Voice Mail Card*

For a more robust feature set and larger message storage capacity, this HDD-based voice mail card is perfect for the medium-sized business needing advanced message notification options, sophisticated call routing or for businesses requiring message storage and retrieval over long periods of time. This is also an 8-port system, but has unlimited mailbox capacity and up to 200 hours of message storage.

In addition to all the features offered by the Flash-based system, the HDD-based system also offers:

- Cascading Menus
- Cell Phone Notification
- Flag messages with special delivery options
- Incoming Caller ID
- Park & Page

### *STARPLUS STS In-Skin Voice Mail Solutions*

*By offering two voice mail solutions that plug right in to the STARPLUS STS system cabinet, voice mail becomes a refreshingly affordable option for any small business. The in-skin "card" eliminates the need for expensive external equipment.*

*Both systems are 8-ports. The Flash card is for users requiring fewer than 64 mailboxes and 9 hours of storage. The HDD card is for users with greater mailbox and message storage requirements, or more sophisticated call routing needs.*

The **2.4 GHz Wanderer** - With many of the benefits of the STS phone, the Wanderer adds mobility from 100 to over 250 feet with the accessibility of your desktop phone number and extension. The Wanderer range may vary based on environment.

**Door Phone** - Add a one-touch two-way Vodavi speakerphone for communication with visitors at a gate or door entry.

Account Codes - Unverified/Verified/Traveling COS	Call Operator/Attendant (Programmable Code)	Extension Groups (Paging, Pick Up)	Pause Insertion
